

North Pacific Fisheries Commission

NPFC-2025-FAC07-IP02

Information Paper submitted by the Secretariat

Performance Review Update

Abstract: The NPFC Commission, through an intersessional decision-making process after COM06, agreed to conduct a performance review. This performance review report (<https://www.npfc.int/report-2022-npfc-performance-review>) was presented at COM07 with the decision that individual subsidiary bodies would review the recommendations and consider their status and implementation. COM08 decided that updates would be based on activities undertaken and populated for information into the spreadsheet. The posted excel spreadsheet provides the recommendations from the performance review and status that have been populated by subsidiary bodies, Chairs and the Secretariat.

Background: Article 22 of the NPFC Convention provides for a regular review of the effectiveness of the conservation and management measures adopted by the Commission in meeting the objective of the Convention. This review was put in place through an intersessional decision-making process that included establishing its terms of reference and the constitution of the review panel.

The review was conducted virtually through a series of on-line interviews and email exchanges.

Considerations: The easiest way to review the updates for an individual subsidiary body is to use the excel spreadsheet ([available here](#)) and make use of the filter function.
